

VISION 2020

Redesigning Cities for the Future

By 2050, almost three-quarters of the world's population will live in large metropolises. In the face of political, social, economic and technological challenges with built environments, it is provocative and flexible solutions that may provide the blueprint for tomorrow's urban spaces.

Sydney's livability and cultural identity stand out from other competing Asian Pacific capitals. Sydney is Australia's global city known for its iconic landmarks; Harbour Bridge, Sydney Opera House, Queen Victoria Building and under construction, Frank Gehry designed UTS business school.

Date and Venue: Thursday, **28 February 2013** (from 5.30pm), AMP, 33 Alfred Street, Sydney

Welcome: **Louise Mason:** Managing Director of AMP Capital Office & Industrial

Guest Speakers: [Click here: Event Registration](#) Refer below: **2013 Sydney Series**

Dr Tim Williams: CEO, Committee for Sydney

Tim has been in this role since November 2011. Before coming to Australia, he was Senior Special Advisor to a number of UK cabinet ministers in the Department of Communities and Local Government. In that role, between 2005 and 2007 he was one of the United Kingdom's leading policy makers on urban regeneration, housing and city development.

Professor Roy Green: Dean, UTS Business School, University of Technology Sydney

Roy has published widely on innovation policy and management; and works with business, universities and government in Australia and overseas, including the OECD and European Commission. He is chair of the Australian Govt's Innovative Regions Centre and member of the Manufacturing Leaders Group and Sydney's Global Talent Hub advisory committee.
